The products were formulated with eggs, milk and wheat, known allergens which are not declared on the product label.

The following products are subject to recall:

The recalled products were mislabeled by Prime Pak Foods and were not sold at Wegmans or other retail stores. The products were distributed to hotels, restaurants and institutions nationwide.

The products were produced from June 5, 2013 to March 21, 2014. The products bear the establishment number "P-9165" inside the USDA mark of inspection.

The problem was discovered by the company during the product recovery phase of recall 023-2014 when misbranded product not from the previous recall was observed.

FSIS and the company have received no reports of adverse reactions due to consumption of these products. Anyone concerned about a reaction should contact a healthcare provider.

FSIS routinely conducts recall effectiveness checks to ensure that steps are taken to make certain that the product is no longer available to consumers.
