RE: Recall Announcement (ODA/ODH) 2016-60a3

Expanded Recall Period of Certain Sunflower Kernel Products Due to Possible Contamination By *Listeria monocytogenes*

May 18, 2016 - TORONTO – As a precaution, SunOpta expanded its voluntary recall of a limited number of sunflower kernel products that have the potential to be contaminated with *Listeria monocytogenes*, an organism which can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Although healthy individuals may suffer only short-term symptoms such as high fever, severe headache, stiffness, nausea, abdominal pain and diarrhea, listeria infection can cause miscarriages and stillbirths among pregnant women.

The initial recall was limited to sunflower kernel products produced at SunOpta’s Crookston, Minn. facility between the dates of February 1, 2016 and February 19, 2016. The expanded recall includes products produced February 20, 2016 through April 21, 2016, the date on which the facility ceased production of the products. No illnesses have been confirmed related to the consumption of this product.

Recalled retail items were sold in clear printed plastic packages and are marked with Best By Dates located on the front or back of the packages. Listed below are details regarding the recalled items:
